

TURNING YOUR SUPPLY CHAIN INTO A COMPETITIVE ADVANTAGE

Hosted EDI System

The **Hosted EDI System** enables business to business integration with global suppliers, customers, shippers, and manufacturers quickly and without interruption by setting up a new Electronic Data Interchange (EDI) program from the ground up. The system is rapidly configured to your specific business requirements and integrates with back end and legacy systems to ensure the timely and accurate delivery of business critical data.

Functionality

- On demand web EDI Portals connecting you to trading partners
- Any-to-any data translation (trading partner spreadsheets, XML, EDI, etc.)
- Multiple, secure channels for business to business connection including FTP, AS2 and VAN
- Plug and play interfaces to provide instant back end and legacy system integration

Benefits

- Instant visibility to trading partner data
- Reduce time spent tracking and troubleshooting transaction data
- Lower total cost of ownership
- Improve data integrity by reducing manual processing of trading partner data

Hosted EDI System (cont'd)
